

## The PRN Difference

### PRN's eye-health nutritional supplements are recommended by your doctor because:

- Omega-3 form naturally found in fish, but with no contaminants or toxins
- Maximum body absorption without side effects — something store-bought brands typically can't deliver
- Manufacturing standards that ensure superior purity and safety
- Products specific to eye health and dry eye symptom relief
- Recommended by the world's leading ophthalmologists
- Safe to use with anticoagulant therapy\*
